

Explain

We are starting to understand how forces make things move (or not move). You will now learn more about the scientific ideas behind contact forces so that you can explain why things move, what a push/pull is, and what happens when objects collide. Watch the videos provided by your teacher. Complete the graphic organizer below, recording definitions, examples, and diagrams.

Topic	Definition and Example	Diagrams
Forces		
Newton's 1st law		
Newton's 2nd law		
Newton's 3rd law
